

## **Under-Graduate Programme with MATHEMATICS; 3<sup>rd</sup> Semester**

### **MATHEMATICS**

### **MMT326J: CALCULUS – II**

### **Theory: 4 Credits (60 Hours)**

### **MAJOR COURSE**

### **Credits: 4 THEORY + 2 TUTORIAL**

### **Tutorial: 2 Credits (30 Hours)**

**Course Objectives:** (i) To study and understand the notions of integral calculus and to imbibe the acquaintance for using the techniques in other sciences and engineering. (ii) To prepare the students for taking up advanced courses of mathematics.

**Course outcome:** The techniques involved in the course shall be used to estimate area and to solve complex problems.

#### **Theory: 4 Credits**

#### **Unit –I**

Standard cases of partial fractions, Integration of rational functions when the denominator consists of repeated and un-repeated linear factors and also with quadratic factors. Integration of Irrational functions. Integration of functions like  $\frac{1}{a+b \cos x}$  etc.

#### **Unit –II**

Reduction Formulae of the functions:  $\int \sin^n x \, dx$ ,  $\int \cos^n x \, dx$ ,  $\int \tan^n x \, dx$ ,  $\int \cot^n x \, dx$ ,  $\int \sec^n x \, dx$ ,  $\int \operatorname{cosec}^n x \, dx$ ,  $\int \sin^m x \cos^n x \, dx$ ,  $\int x^m \cos nx \, dx$ ,  $\int \sin^m x \sin^n x \, dx$ ,  $\int \cos^m x \cos^n x \, dx$ . Definite Integrals with properties, definite integral as limit of sum.

#### **Unit –III**

Fundamental theorem of calculus, Differentiation under an integral sign, Rectification: Rules for curve tracing, formula for rectification and examples. Beta and Gamma functions: their properties and applications.

#### **Unit –IV**

Quadrature. Area of a region bounded by a curve, x-axis (y-axis) and two ordinates (abscissa), sectorial areas bounded by a closed curve. Lengths of plane curves. volumes and areas of surfaces of revolution.

#### **Tutorial: 2 Credits**

#### **Unit –V**

Examples based on Unit-I and Unit-II.

#### **Unit –VI**

Examples on Beta and Gamma functions, examples based on applications of Beta and Gamma functions, examples based on area under curve, area between two curves arc length and volume.
